## HOW IT WORKS

1. Using your report writer in your ILS system, request a query of your holdings. You may create multiple lists from subsets of your catalog—such as by subject area, or lists identified for weeding or storage
2. Bowker will provide instructions for you to FTP the file you generate to the analysis tool.  
(Depending on your subscriptions to the H.W. Wilson Standard Catalogs, you will have the ability to compare your collection to up to five Standard Catalogs).
3. After providing Bowker with basic information about the format and contents of your file, your holdings will be matched against your Wilson Standard Catalog(s) by ISBN, LCCN, and Title & Author.
4. When the analysis is complete, you will receive an e-mail inviting you to log-in to **Bowker's Book Analysis System** to view or download your reports.

## ADDED VALUE REPORTS

- In addition to your core match file, four value-added files will be provided, including:
- A no-match file
  - A file of the invalid ISBNs in your collection
  - A file with the new 13-Digit ISBN conversion for your submitted files
  - A file on the duplications of multiple formats or editions for same title

All files can be downloaded in CSV format for easy use, further analysis, and incorporation into your ILS.
